# Subject Index of Volume 165

Abrasives
influence of the mass flux and impact angle of the abrasive on the erosion resistance of materials used in pulverized fuel bends and other components in thermal power stations, 151
Austempered SG Al cast iron
the tribological behaviour of austempered spheroidal graphite aluminium cast iron, 19

Carbide tool life
a new look at carbide tool life, 9
Carburized high chromium steels
wear of carburized high chromium steels, 109
Ceramics
study of abrasive wear resistance of transformation toughened ceramics, 159
9% Chromium steel
the abrasion and abrasion–corrosion properties of a 9% chromium steel, 213
Contamination
control of solids contamination in hydraulic systems — An overview, 69
Copper compounds
tribochemical studies by XPS analysis of transfer films of Nylon 11 and its composites containing copper compounds, 205
Copper contacts
Surface damage, adhesion and contact resistance of silver plated copper contacts subjected to fretting motion, 227

Diamond thin films
laser chemical vapor deposition of fluorinated diamond thin films for solid lubrication, 133
Displacement accommodation
a quantitative investigation of displacement accommodation in third-body contact, 123

Electrochemical methods
investigation of the wear behaviour of tyre steel cords using electrochemical methods, 57

Film formation
wear and film formation in the presence of methanol and formic acid, 75
Formic acid
wear and film formation in the presence of methanol and formic acid, 75
Fretting
surface damage, adhesion and contact resistance of silver plated copper contacts subjected to fretting motion, 227

Hot rolling rolls
analysis of banded hot rolling rolls, 231
Hydraulic systems
control of solids contamination in hydraulic systems — An overview, 69

Implantation
a study of the relationship between wear rate and nitrogen concentration profile and application to plasma source ion implanted Ti-6Al-4V alloy, 97

Metal matrix composites
on the wear of aluminium and magnesium metal matrix composites, 221
Methanol
wear and film formation in the presence of methanol and formic acid, 75
Microstructure
effect of microstructure on material wastage in a room-temperature fluidized-bed wear-test rig, 25
$MoS_2$
mechanistic study of the synergism between $Sb_2O_3$ and $MoS_2$ lubricant systems using Raman spectroscopy, 103
Multicomponent coatings
review of multicomponent and multilayer coatings for tribological applications, 85
Multilayer coatings
review of multicomponent and multilayer coatings for tribological applications, 85

Ni–Cu–P brush plating layer
the wear resistance of an Ni–Cu–P brush plating layer on different substrates, 63
Nylon 11
tribochemical studies by XPS analysis of transfer films of Nylon 11 and its composites containing copper compounds, 205

Oil supply
an experimental study on oil supply in a space bearing with an oil-impregnated retainer, 193
Optical profilometer
a fast 2D/3D optical profilometer for wide range topographical measurement, 197

Powder metallurgy
sliding-wear behaviour of ceramic particle-reinforced high-speed steel obtained by powder metallurgy, 141
Pulverised fuel bends
influence of the mass flux and impact angle of the abrasive on the erosion resistance of materials used in pulverized fuel bends and other components in thermal power stations, 151

Real contact area
effects of real contact area and topographical features of wear surfaces on abrasive wear of metals, 181

$Sb_2O_3$
mechanistic study of the synergism between $Sb_2O_3$ and $MoS_2$ lubricant systems using Raman spectroscopy, 103
Silicon nitride
wear transition diagram for silicon nitride, 169
Solid lubrication
laser chemical vapor deposition of fluorinated diamond thin films for solid lubrication, 133

Space bearing
an experimental study on oil supply in a space bearing with an oil-impregnated retainer, 193
Spherical plain bearings
the load ratings of spherical plain bearings, 35
Surface erosion
accelerated surface erosion by cavitating particulate-laden flows, 113
Synovial joint
lubrication of a cylindrical synovial joint considering rolling motion and elastic incompressible cartilage, 1

Ternary PVD coatings
dry sliding wear of TiN based ternary PVD coatings, 41
Third-body contact
a quantitative investigation of displacement accommodation in third-body contact, 123
Ti–6Al–4V alloy
a study of the relationship between wear rate and nitrogen concentration profile and application to plasma source ion implanted Ti-6Al-4V alloy, 97
Tyre steel cords
investigation of the wear behaviour of tyre steel cords using electrochemical methods, 57

Wear-test rig
effect of microstructure on material wastage in a room-temperature fluidized-bed wear-test rig, 25
Wear transition diagram
wear transition diagram for silicon nitride, 169

Zn–Al–Si alloys
wear in Zn–Al–Si alloys, 51
